Executive Summary

Hybrid IT Support & Security Operations Analyst holding CompTIA CySA+, Security+, and EC-Council Certified SOC Analyst (CSA) credentials. Proven track record of conducting threat hunting and triaging high-velocity endpoint, network, and email related incidents utilizing CrowdStrike Falcon, Palo Alto Cortex XSOAR, Elastic, Proofpoint TAP, and Panorama in an enterprise environment. Applies context-aware decision-making, deep resourcefulness, and AI-assisted workflows to accelerate investigations, eliminate false positive noise, and determine root-cause threat behavior. Leveraging a Senior Service Desk background to bridge real-world user behavior with security operations, delivering high-quality incident documentation and cross-functional threat containment.

Technical Skills

- **Endpoint, Network and Email Incident Triage:** CrowdStrike Falcon, Palo Alto Cortex XSOAR, Elastic, Proofpoint TAP & Mail Filtering, ThreatDown (MBBR), Alert Triage & Rapid Containment, Open-Source Tooling
- **Defensive Security Operations and Automation:** Log Correlation, Alert Tuning, Python, PowerShell, Bash, MSGraph API, AI-Assisted Workflows, Playbook Authoring and Optimization, Privilege Management with Beyond Trust (Avecto Defendpoint)
- **Threat Hunting and Perimeter Security:** Elastic (ES|QL / Lucene), CrowdStrike Query Language (CQL), Palo Alto Panorama Firewall, GlobalProtect VPN, SolarWinds, Cisco Thousand Eyes, Custom IoA Triage, OSINT
- **Advanced IT Operations and Troubleshooting:** ServiceNow ITSM, Active Directory / Entra, Microsoft 365 / Exchange, MFA/IAM (Okta, Secret Double Octopus, YubiKey), Ivanti MDM, TCP/IP, DNS, Root-Cause Analysis
- **Research and Documentation:** Detailed Incident Triage Write-ups (Actions, Findings, Verdict, Remediation), SOP's and Knowledge Base (KB) Authoring, End User Training, Pilot Testing Feedback

Related Work Experience

Ashurst Perkins Coie (Formerly Perkins Coie) | November 2023 - Present

Senior Service Desk Support Technician | July 2026 - Present

- Dedicates ~26 hrs/wk triaging endpoint, network, and email related security incidents, authoring post-triage writeups. Working directly with end users to gather intelligence or context, provide training, and remediate threats in accordance with runbooks. Contributed operational coverage during the 3-month sabbatical of a Senior Cybersecurity Engineer managing Falcon sensor updates, triaging additional detection types and collaborating with security vendors.
- Conducting deep-dive investigations into unapproved Remote Monitoring and Management (RMM) tools, additional unauthorized applications, and custom Indicators of Attack (IoAs) alongside triaging the traditional phishing and email related incidents.
- Allocating 10 hours weekly to senior operational governance within the IRT, auditing ServiceNow queues to enforce ITSM policy, ticket documentation quality and mentoring technicians. Leading Tier 1 Major Incident Response participation during outages by managing parent tickets, joining incident bridges, and activating soft-phone outage recordings. Continuing to deliver traditional troubleshooting and break-fix technical support by fielding incoming help desk calls, email support tickets and deskside support in office.

Service Desk Support Technician | November 2023 – July 2026

- Expanded dedicated cybersecurity support from 5 to 15 hours weekly, triaging high-velocity phishing and other email related threats using Proofpoint TAP, Cortex XSOAR, Wildfire sandboxing, and CrowdStrike Falcon within strict SLA targets.
- Maintained above-average ServiceNow metrics for first-call resolution and handle time, authored team-benchmark Knowledge Base (KB) articles and SOP's and provided actionable feedback during enterprise software rollouts.
- Delivered technical troubleshooting against hardware, software, VPN, and other network issues across a global legal enterprise. Participated in pilot group rollouts. Provided onsite technical support for office relocations and remodels.

Systems Administrator | *Wash Worx LLC* | May 2023 – March 2024

- Elevated organizational security posture by implementing mandatory Multi-Factor Authentication (MFA), password management solutions, automated patch management, and Identity and Access Management (IAM) user account lifecycle controls.
- Single-handedly researched, architected, and deployed Microsoft cloud solutions to ensure infrastructure scalability, data integrity, and reliable remote/onsite system troubleshooting.
- Developed standard operating procedures (SOPs) for employee onboarding and offboarding, aligning IT operations, identity governance, and access control policies with overall business objectives.

SMIT Help Desk Tier 1 | *Leidos* | March 2023 – October 2023

- Enforced Department of the Navy Zero Trust policies, managed user accounts and permissions, and collaborated directly with SOC, NOC, and NNWC Cloud Operations to report security events and ensure asset compliance.
- Diagnosed and resolved complex hardware, software, and network connectivity issues under strict Service Level Agreements (SLAs) in an enterprise defense environment, maintaining low handle times and high first-call resolution rates.
- Maintained meticulous ticket documentation, followed approved escalation pathways, and reported system outages, delivering clear technical communication and customer support during high-volume incidents.

Certifications and Education

CompTIA CySA+ | Active through June 2029

CompTIA Security+ | Active through June 2029

EC-Council Certified SOC Analyst (CSA) | Active through May 2028

Cybersecurity Certificate | Colorado Technical University | January 2023
